Packaging and Packaging Waste Directive

Year 2018

What is the “Packaging and Packaging Waste” directive

It is the Directive 94/62/EC of the European Parliament and of the Council of 20 December 1994 and its subsequent updates, on packaging and packaging waste, which includes measures to limit production, to promote recycling, re-use and other forms of recovery of such waste.

Compliance with directive 94/62/EC of Pizzato Elettrica products

Pizzato Elettrica has verified compliance with the limits set by the directive, which is that all packaging supplied has a heavy metal content (cadmium, lead, mercury, hexavalent chromium) lower than 100 parts per million (ppm).

Pizzato Elettrica therefore declares conformity with directive 94/62/EC and its subsequent updates.

For any further clarification, please write to info@pizzato.com.
